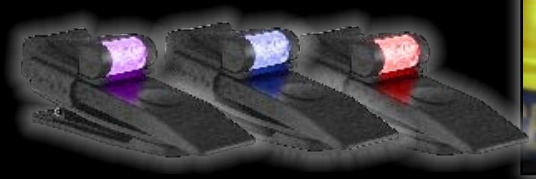
NITON EQUIPMENT LIGHTING ZONE

LIGHTING FOR WRITING!



QUIQLITE PRO

- *New 360° rotating removable QuiqClip*
- *New 180° Adjustable rotating clear L.E.D. lens*
- *100% Concealed in the uniform shirt pocket*

Independent L.E.D. activation. 50+ hours of continual light. 10 minute Auto-Off. New water resistant housing. Instant On/Off with the push of a button.
Colours: White, Blue, Red or UV.

Code AA469

PELI VERSABRITE III

- *2 x LED providing 6,000 candlepower*

Xenon body multi-positional lamp with multi-positional clip. 180 rotational head. 100 hours run time. Weight 30g 76 x 30 x 28mm. Colour: Black.

Code PL2220

THE HANDI-LITE

- *Clip on your pocket or belt to leave your hands free*

Flexible neck to direct the light where it is needed. With pocket clip, doubles as a handy search light. Light weight 3½ ounces uses two AA batteries (Not supplied).
Colour: Black

Code AA002

PELI L4 1830 LED

- *The L4 is a handy, unbelievably bright LED light*

Light weight, slim design fits neatly in your pocket and comfortably in your hand. A tail button switch provides quick on/off or momentary activation. The clip is virtually unbreakable because it is moulded to the Xenon body as one unit. Moulded out of polycarbonate resin, it won't cause sparks and is safe to use in electrical environments. 3 AAAA cells (included).

Code PL1830

NEW

NITON TACTICAL LITEDOCK™

NITON TACTICAL
WWW.NITON999.CO.UK

This exclusive range of Niton Tactical™ Flashlights have been designed by the professionals, for the professionals. We have designed them to provide exceptional beam quality and intensity, with superior reliability for any user whether in combat, on patrol or at home. The professionals have come together to set a new standard for flashlights.

Why not put them to the test... We guarantee that you will be impressed!

OPERATOR-5

1. *High Grade aluminium body offering lightweight durability with hard-anodized finish that will resist corrosion. We added knurled grip pads - so even with gloves on you can use your torch.*
2. *Virtually Indestructible LED - Producing more light than larger D cell torches. We only use the highest quality LED's - ensuring over 100,000 hours of light.*
3. *Precision reflector - maximises light output and guarantees a near perfect beam. No more 'Black Spots' - Focused beam for perfect night vision.*
4. *O-Ring Sealed - keeping out dust, dirt and moisture. They have been tested by our own quality control team - Guaranteeing quality, durability and lifelong service.*
5. *Tail-Cap: Large, ergonomic and easy to use in any situation. Press for on/off and twist on/off. Lockout tail cap - to prevent accidental activation.*

WHY CHOOSE LED?

- **LONG RUNTIME**
  LED HAS HIGH EFFICIENCY WHICH MEANS LONGER RUNTIME AS COMPARED TO REGULAR BULB BASED FLASHLIGHTS
- **USABLE LIGHT OUTPUT**
  LED SLOWLY DIMINISHES ITS LIGHT OUTPUT AS POWER RUNS LOW WITHOUT SUDDENLY CUTTING OUT LIKE REGULAR BULBS
- **SHOCKPROOF**
  CONVENTIONAL FLASHLIGHTS HAVE A FRAGILE BULB FILAMENT, LED IS MADE OF SEMICONDUCTOR MATERIAL THAT WILL NOT BREAK FROM SHOCK
- **NO BULB BURNOUT**
  LED HAS A LONG LIFETIME WHICH WILL NOT NEED BULB REPLACEMENT BECAUSE IT WILL NOT BURN OUT

NITON TACTICAL™ L.E. PROFESSIONAL FLASHLIGHT

- *Single High Power White 7W LED*
- *100 Lumens with a Range of 100 metres*
- *Hard Anodized Exterior High Grade Aluminium Body with Anti Roll*
- *Push On/Off Tail Switch*
- *Double O-Ring Sealing*
- *Water and Shock Resistant*

The L.E. Professional utilizes a highly powerful 7W LED as the light source. Onboard electronics regulates the current delivered to the LED to ensure maximum brightness while sustaining the duration of peak brightness. It has a runtime of at least 90 minutes at peak brightness and at least 3 hours of usable light output with diminishing output. The anti-roll shape push on/off tail-cap switch makes it easy for one-hand operation. Crafted out of aerospace grade aluminium tube it is rugged and tough for the harshest environments. Anti-reflective, anti-corrosive, and anti-abrasive finish.
This pack includes: Two CR-123A Lithium Batteries & One Basic Pouch. Boxed.

Code TAC27

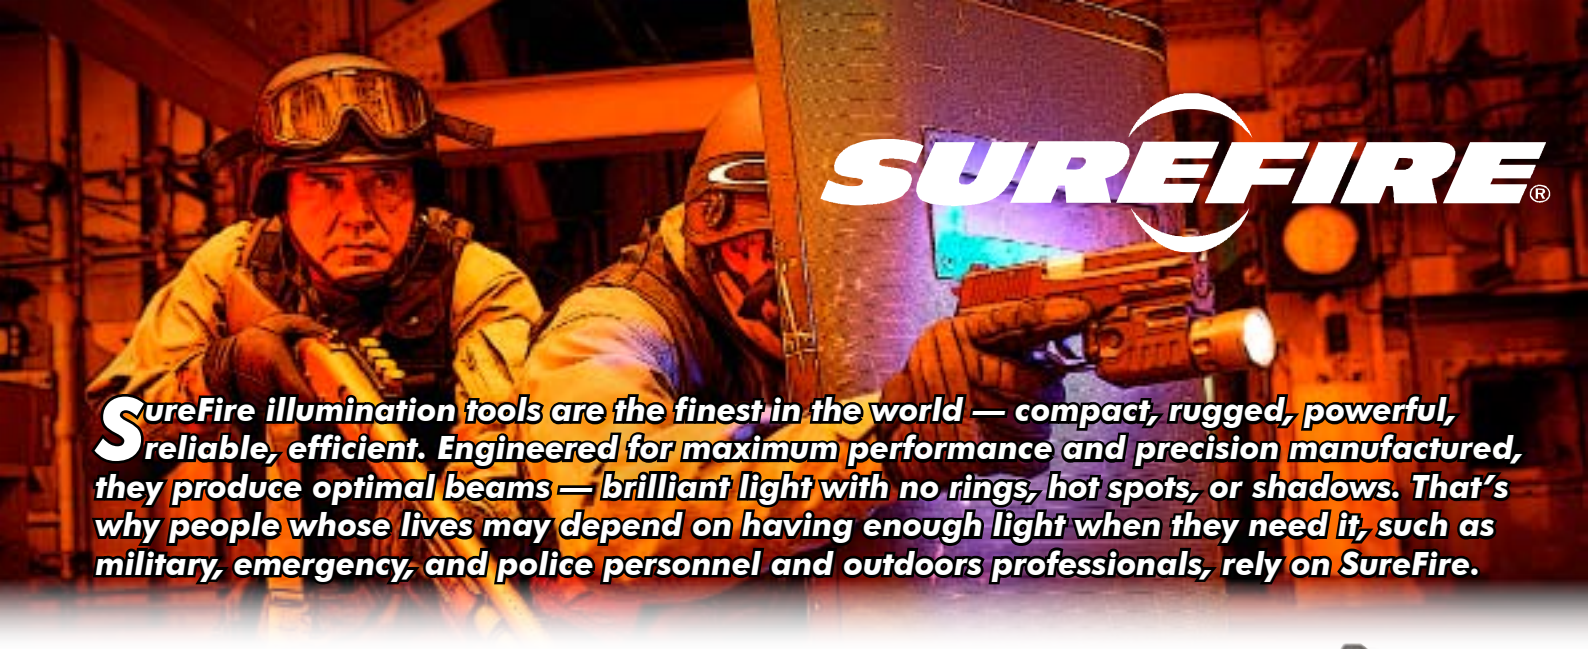
NITON TACTICAL™ L.E. PROFESSIONAL OPERATOR-5

- *5 mode tail cap switch: 1. 100% Power 2. 50% Power 3. 25% Power 4. Slow Flash 5. Fast Flash*
- *Single 7W LED is impact resistant and has no filament to burn out or break*
- *LED Life 100000 Hours*
- *High quality reflector gives ultra bright focused white light*
- *Powered by 2 CR123A lithium batteries, included*
- *High grade aluminium body*
- *O-ring sealed; weatherproof*

The dimming functions (50% and 25% brightness) are ideal for map reading or any situation where 100% brightness is not needed or may be a disturbance. The dimming function enhances the battery life of your flashlight- so it can be used longer and it is much more cost effective.
The slow flash function is intended for use in situations where there is a need to draw attention over a long period of time, for example, hikers that may get lost. In this function the batteries will last 8 times longer.
The fast flash function is intended for use as a warning signal, for example to warn oncoming traffic at an accident scene.
To further save battery power and to prevent total battery run down, if you should forget to switch off your flashlight, the flashlight will switch off automatically after 15 minutes when in modes 1-3.
Impact resistant aluminium alloy casing
This pack includes: Two CR-123A Lithium Batteries. Boxed.

Code TAC48



SureFire illumination tools are the finest in the world — compact, rugged, powerful, reliable, efficient. Engineered for maximum performance and precision manufactured, they produce optimal beams — brilliant light with no rings, hot spots, or shadows. That's why people whose lives may depend on having enough light when they need it, such as military, emergency, and police personnel and outdoors professionals, rely on SureFire.

75mm with a metal clip that attaches perfectly on to your body armour radio loops. Features include; 2 mile signal visibility, 50' effective range, microprocessor controlled, waterproof construction, LED lifetime bulbs with lithium battery included that gives you up to 15,000 hours run time. 8 dial lighting function for easy operation, even with gloves on.
Code INO247

LIGHTING ZONE

HARDCASE TACTICAL

NEW

1. Flashlight Head - Rotates 210° Ideal for positioning light when attached to vest, signalling or standard torch illumination.

2. RED LED: Map Reading, signalling with minimal effect on your eyes.

3. Infrared LED: Illumination with night vision goggles, enhances wearers vision without emitting any light to the naked eye.

4. Blue LED: Signalling, and to comply with light disciplined medical situations. Limits amount of illumination but clearly shows blood.

5. Bright High Intensity White LED: 70 Lumens / 52 M beam distance. Up to 7.5 Hours Run Time

6. Quiet for stealth movement and noise discipline. Intermediate touch for signalling or instant on/off

7. Heavy Duty Clip: Attaches to outer Molle or web gear vest. Special extra wide design prevents movement when running.

8. Impact resistant ABS plastic body, rubber mould and stainless steel side guards - virtually indestructible.

9. Tail Cap: Momentary white LED switch tail cap allows bust of light and then instant off. Locking tail cap - prevents accidental engaging of IR.

Energizer® Hard Case Tactical LED Infrared Night Vision Flashlight is a rugged and powerful tactical flashlight, designed for tactical, self-defence, or general use.

Hard Case Tactical LED Infrared Flashlight the Toughest Flashlight You Will Ever Need.

TOUGH CASE™ TACTICAL FLASHLIGHT

Five Light Modes:
White: bright high intensity White LED for maximum brightness; White light On/Off switch and momentary for signalling; recessed switch prevents accidental illumination
Red: Red light for night vision and light discipline; Red light On/Off switch and momentary for signalling
Infrared: Infrared for use with night vision goggles; rotating switch for Infrared On/Off; sliding lock secures IR switch
Infrared Strobe: Infrared strobe for locating with night vision goggles
Blue: Blue light for night vision and light discipline

Code ENHARD

HARDCASE TACTICAL

- *Rubber mould for shock absorption and non-slip grip*
- *Stainless steel side guards*
- *Survives 20' drop & Shatterproof lens*

- *Weather-proof & Water-resistant rubber gaskets*
- *Weighs only 8 ozs. when used with lithium batteries*
- *Steel clip for hands free use*
- *Lanyard ring*
- *Lifetime push button quiet switches*
- *2 'AA' batteries included*
- *Lifetime guarantee*

GERBER RECON has the following characteristics:

GENERAL USE

MAP READING

FLUID IDENTIFICATION

NIGHT VISION

DIAL (Diode Illumination Adjustable Lens) system lets you change between white, red, green or blue light

- ***White light for general purpose lighting***
- ***Red light preserves night vision***
- ***Green light for map reading***
- ***Blue light for fluid identification***
- ***Notches identify which lens you are on when it is too dark to see***
- ***All-in-one system means there are no loose, interchangeable lenses to misplace***
- ***Aluminium housing***
- ***Pocket clip***
- ***Lanyard hole***
- ***Water-resistant***
- ***Twist on/off switch***

GERBER RECON™

• Shines four different colours from one super bright white LED for general use; Green for map reading; Blue for fluid identification; and Red to preserve night vision

RECON – White LED – Blue/Green/Red/Clear lens covers. Have the right light at the right time. The Recon employs Gerber's exclusive D.I.A.L. Technology – Diode illumination adjustable lens. 86mm (3.5") Aircraft Aluminium, 1AA battery.

Code GB80016

GERBER TASK LIGHT

• Slim & powerful
• 4 task pods included - Red, Green, Blue, Clear
• Includes ballistic pouch

Crafted to deftly illuminate restricted spaces. Red: Night Vision Blue: Fluid Identification Green: Be Seen & map reading Clear: General Tasks. Takes 2 AAA batteries with nylon sheath holds light and pods.

Code GB80062

ATMOS CAP LIGHT

• Clips unobtrusively to ball caps
• Leverages a customized envelope reflector to emit a broad beam pattern for maximum area illumination

Weighs just one ounce. Effective distance: 50 feet. Powered by a single CR2 lithium battery. 18 Lumens. Colour: Black. CAP NOT INCLUDED.

Code GB80113

Why Choose Rechargeable Batteries?

To start with most batteries can be recharged between 500-1000 times. They are perfect for today's various applications including; Digital cameras, Flashlights, music equipment and torches. Using rechargeable batteries will increase the performance and durability of your camera and flashlight, and save you hundreds of pounds!

YOU save hundreds of pounds!

Rechargeable batteries last as long as alkaline batteries, but can be recharged up to 1000 times. You save money, and save the environment too.

Did You Know... The average Law Enforcement Officer uses 2 D cell batteries every two weeks. This makes 78 batteries a year at around £2.00 each. That's £156.00! Switch to rechargeable and this could save you over £750 in 5 years!

PRO RECHARGEABLE

- *High performance carefully selected just for your needs*
- *AAA, AA, D & 9V*
- *Special prices for bulk orders.*

Rechargeable up to 1000 times, you will hardly ever need to buy more batteries. Best Quality & durability ideal for use in flashlights, cameras etc.

LED FLOOD LAMP

• Impact resistant, dust proof, waterproof & Rated:IP65

• 168 LED's offer Luminescence lighting without generating heat

• Low power usage, No contamination & Environmental protection

Gone are the days of large, cumbersome Flood lamps. The next generation of outdoor lighting system offers many advantages over the conventional flood lamps. Traditional lamps are fragile and prone to damage, they generate vast amounts of heat which can cause safety issues. This LED lamp will never overheat, it has 168 high quality LED's that will give you 100,000 hours of light with no UV emissions. Both units come complete with tri-pod.

Input Voltage: From 110v to 240v AC
Working Voltage: 5 to 24v/DC
Working Temp: -40 to +65 degrees
Power: 13.5 Watts
Style: 5 inch Ellipsoid
LED usage life: 100,000 hours
Number of LED's: 168
Dimensions: 180 x 120 x 130mm
Weight: G/W: 3.2Kg N/W: 3Kg

Code NPW053

BUST A CAP®

• *One-of-a-kind device that attaches to your existing flashlight or baton that gives you a rapid entry tool and tactical advantage to break glass.*
• *Made steel, can be applied in less than a minute, requires no training and will break glass with one tap.*

Bust a Cap® has no moving parts and can be deployed with either your strong or weak hand. There is no way you can break a window with a flashlight or baton without causing damage to your expensive equipment or injuring someone from flying glass. Attaching Bust A Cap® to your flashlight will insure that it will break glass with just one tap and not damage your equipment.
